

Design, Development & Manufacture of After-Market Accessories

Design Solution

Example: Face Lift Kit for Ssangyong Actyon (2006 – 2013 Model)

Description

The most prominent problem with this vehicle model is the design of its face. Many customers were reluctant to purchase mainly because of this reason. I designed and developed this unique Bumper-Cover with embedded Daytime Driving Lamps (DRL), Fog Lamps & Skid Plate according to my own concept to eliminate that odd – look of these vehicles. It became so popular.
